-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claim 4 is objected to because of the following informalities. Claim 4 recites an opposite side of the carrying surface but it seems from the specification and the drawings in particular figure 3b that the carrying surfaces claimed are on the same and not opposite sides. Claim 15 recites "said plurality of developer carrying screws" which lacks antecedent basis and may have intended to recite a plurality of carrying screws. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 4-7, 11, and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Yoshida (JP2002-278270A). The developer carrying screw 6 in parallel with a developer bearing member 3 comprises an inclination angle of the carrying surface of a blade with respect to the rotation centerline of the shaft that is different from the inclination angle of the carrying surface of an opposite side of the carrying surface.

4. Claims 15-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Sharpe (5,204,721). The carrying screw by Sharpe, which is parallel to the developer bearing member 35-38, comprises an inclination angle of a carrying surface of one of a plurality of blades 86 with respect to the rotation centerline of the shaft that is different from the inclination angles of the carrying surfaces of the other plurality of blades 88.

Art Unit: 2852

Allowable Subject Matter

5. Claims 8-10 and 17-23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
